Professional Heat Pump Manufacturer & Energy Saving Expert

About Blueway

The name of BLUEWAY was founded in Australia in 1993. It has earned a worldwide reputation in the field of liquid heating and cooling systems (air conditioner, chiller and heat pump) through about 30 years experience in this industry. In 2011, Blueway established its subsidiary manufacturer in Shunde, Foshan of China, utilizing the manufacturing advantages here and supply products worldwide.

Blueway has developed its intelligent control system with precise timing, temperature control and remote monitoring function. What's more, Blueway is also the recommended brand by Hilton Hotel in the domestic market, energy-saving solutions could be credibly provided with quick response.

Product Range

Blueway is capable of manufacturing and supplying even the largest liquid heating and cooling requirement for applications as diverse as:

- Commercial and industrial dehumidification and air handling systems
- Domestic and commercial hot and chilled water for homes and buildings
- Heating, cooling & sanitary hot water for houses
- Industrial water heating and cooling
- Other specialist requirements

All our products are produced and tested in accordance with strict international quality control systems and standards, thus are able to adapt different weather conditions globally.
